

Single IBC Spill Pallet - BB1D

A large capacity spill pallet with a built-in dispensing area moulded from medium density polyethylene suitable for use with most common sizes of intermediate bulk container (IBC), this unit complies with the UK 110% regulations, has broad band chemical compatibility and is rugged enough to withstand constant use. Instead of a removable deck this model has support columns moulded into the unit that the IBC sits directly on to. If you use IBCs with metal pallet bases we recommend you use mode BB1DGB.
