

Sump Floor - BF6

Backed by our 3-year guarantee

A low profile 6-drum sump floor is only 150mm high moulded from medium-density polyethylene. The BF6 is comprised of 2 separate units, our BF4 & BF2, connected using our joining strip & optional sump connector. This can be further joined with other units to create unlimited bunded areas. The units can be joined together with plastic connectors to inter-link the sumps with the BF4 injection moulded mesh floor having a 2000kg static weight load & the BF2 mesh floor having a 1000kg weight load. Each unit comes with separate removable grids (3 total - BF4 2 & BF2 1). Optional ramps are available for easier decanting.

The sump will not include pre-drilled holes. Please see the 'BF6 Configuration' document for instructions.

You will require an appropriate size/capacity fork lift truck to offload this item from the delivery vehicle. Our standard delivery doesn't include any offloading.
