

Covered Drum Spill Pallet - BP4C

Designed to give you the flexibility of using a poly spill pallet outdoors without the sump filling with rainwater this 4 drum spill pallet comes complete with a self-assembly steel frame and polyethylene cover. The opening flap of the cover has ties to hold it in place when "rolled" open and makes use of a "hard" polyethylene roof. The roof helps prevent the bowing of the PVC cover as well as providing a longer life through general use. The sump complies with all the UK regulations relating to sump capacities.
