

Wall-Mounted Covered Emergency Eye Wash Basin - CSE-580

This wall-mounted high visibility yellow eye washbasin has a plastic basin and full cover plastic hinged lid which ensures that the basin and spray heads are fully protected from dirt, dust and debris thus ensuring that the unit is always ready for use.

To activate simply lift the lid which is connected to a stay-open, chrome plated brass ball valve, the lid will remain open and water will continue to run until the lid is closed again; thus providing hands free use.

The twin aerated spray heads with automatic flow control provide aerated soft water which in turn provides wider decontamination coverage.

SPECIFICATION	
Bowl:	279mmØ
Valve:	1/2" NPTF
Supply:	1/2" NPTF
Flow rate:	12ltr @ 2.07 Bar
Compliance:	ANSI 358.1
