

HIBC-LID - Insulation IBC Lid for use with heater

It is a simple fact that heat rises and with all IBC heating applications some thermal loss will be experienced from the top of the IBC. This thermally efficient insulation lid provides a solution for these losses and significantly increases the performance of the heating jacket. (20% increase in achievable maximum temperatures and a reduction in process heating times) Manufactured in flame retardant Polyester the HIBD lid is a must have accessory when looking to achieve optimum heating performance.
