

## HISD-LID - Insulation Drum Lid for use with heaters HISD/D & HISD/E

It is a simple fact that heat rises and with all drum heating applications some thermal loss will be experienced from the top of the drum. This thermally efficient insulation lid provides a solution for these losses and significantly increases the performance of the heating jacket. (20% increase in achievable maximum temperatures and a reduction in process heating times) Manufactured in flame retardant Polyester the HISD-LID is a must have accessory when looking to achieve optimum heating performance.
