

HSSD/D - Silicon Side Drum Heater for 200ltr Drums

This side drum heater is ideal for fast, aggressive, high powered heating performance and incorporates a 0°C -120°C capillary thermostat as standard (digital option available) that delivers precise even heating from PFA coated, multi-stranded resistance wires. The wires are laid with optimum design throughout the heater giving superior flexibility while negating the physical stress caused by thermal expansion during operation.

Applying uniform surface heat to the product eliminates concerns for localised overheating and prevents damage to more sensitive materials such as sugars or glucose and other viscous materials such as soaps, fats, foodstuffs, varnishes and chemicals allowing them to be pumped or poured with ease. A simple fixing arrangement via a hook and spring provides swift, flexible and easy installation/removal.

SPECIFICATION	
Drum Size	200ltr
Material	PFA multi strand resistance wire between silicone rubber and glass fibre sheets
Fixing	Hook and spring
Thermostat	0°C -120°C or digital
Power cable	2 Metre HO7RN-F
Option 1	125mm x 1665mm heater band size with a power rating of 110V or 230V 1000W
Option 2	180mm x 1665mm heater band size with a power rating of 230V 1500W

Please specify option 1 or 2, including thermostat type and power rating required
