

## IBC Spill Pallet - IBC2

Manufactured from steel plate and RHS corner posts, the fully seam welded sump which complies with all the current UK regulations relating to sump capacities is fitted with galvanised steel grid mesh panels and fork hoops to ensure the underside is no in contact with the ground and aid movement by fork lift truck. This model holds 2 IBC's (one above the other) with the top unit sitting on a shallow drip tray which drains back into the main sump through the hollow support frame. Prior to painting the unit is fully shot blasted to provide a clean and keyed surface. This model can hold  $2 \times 1000$ ltr IBC.

This unit will be delivered by an HGV, possibly articulated therefore please ensure that a vehicle of this type can access your premises before ordering and advise us accordingly.

You will require an appropriate size/capacity forklift truck to offload this item from the delivery vehicle. Our standard delivery doesn't include any offloading.
