

Internal Drum Store - IS8B

Designed to provide safe, fully bunded storage for indoor application the base of this model is manufactured from steel sheet, RHS cross members, pressed ribs and a heavy duty RHS end frame with corrugated panels. The fully seam welded sump, which fully complies with all the current UK regulation relating to sump capacities is fitted with pallet support beams onto which the pallet sits directly and the underside of the unit is fitted with base plinths to eliminate contact with the ground and reduce the risk of corrosion. Prior to painting the unit is fully shot blasted to provide a clean and keyed surface. This model can hold 8 x 205ltr drums.

Chargeable options:

- Galvanised steel grid mesh
- Galvanised steel pallet channels

Please notify us at the time of ordering if you require either of these options.

This unit will be delivered by an HGV, possibly articulated therefore please ensure that a vehicle of this type can access your premises before ordering and advise us accordingly.
