

Maintenance Spill Kit Metal Spill Station - M260MSS

A spill response station stocked with an absorbent roll, pads and socks so you can respond to daily housekeeping issues in a defined area. Site spill stations at intervals along your production line, at a dosing point or in maintenance areas to allow staff to deal with spills quickly and effectively.

This model has a painted steel cabinet however we also offer a polyethylene variation for locations that have compatibility issues with steel or for use in hygiene/food areas.
