

Permanent Boom - PB500

Available in 2 standard size and custom dimensions to order permanent booms are suitable for long term deployment because they are robust and hard wearing. Floatation is provided by rigid foam filled floats which are bolted to the skirt which is naturally rigid helping it stay upright in the water. Ballast is provided by a metal chain attached to the bottom edge.

Note - Freeboard is the vertical height of the product above the water and draft is the depth of the product below the water.
