

Speakman® Drench Hose - SE-921

A laboratory hose activated by means of a squeeze handle with self-closing valve that ensures the water supply stops as soon as the handle is released. The outlet is fitted with a protective cap to ensure dust and debris can't affect the water outlet, the cap automatically opens with the activation of the water supply.

SPECIFICATION

Hose	1.5m reinforced 750psi burst pressure – integral valve hanger
Valve	3/4" NPTF chrome-plated brass
Supply	1/2" NPTM
