

Technical Data Sheet | HIJD

Insulated Jacket

A high performance un-heated insulated jacket made from a highly durable flame retardant polyester fabric and insulated with a thermally efficient, flexible E-glass fibre blanket, fitted with Velcro straps and a moveable flap for ease of access. The HIJD un-heated jacket provides a cost effective method of minimising heat loss from pre-heated containers and their contents. When used in conjunction with the base drum heater (HBD) heating times and energy costs are reduced. This product is suitable for a 200ltr drum.

Product Specifications

Material:	Flame retardant polyester fabric
Insulation:	Polyester Fibre
Fixing:	Velcro
Tolerances	Suitable for use up to 90°C (Higher temperature versions available upon request)

Product Features and Benefits

- Cost-effective solution for minimising heat loss from pre-heated 200L drums
- Manufactured from durable, flame-retardant polyester fabric
- Insulated with flexible, thermally efficient E-glass fibre blanket
- Fitted with Velcro straps and a moveable flap for easy access and secure fit
- Enhances energy efficiency and reduces heating times when used with base drum heaters
- Ideal for maintaining temperature of sensitive materials without active heating
