

Technical Data Sheet | OS260PSS
Oil Selective Spill Kit (Polyethylene Spill Station) | 260ltr

This oil selective spill station features a durable rotationally moulded plastic cabinet, making it ideal for everyday spill management or as part of a comprehensive spill response plan. Designed to absorb up to 260ltrs, the included absorbents effectively tackle hydrocarbon spills (such as oil, fuel, and diesel) while repelling water, ensuring optimal performance even in wet conditions. For environments where a metal option is preferred, we also offer the same spill station in a painted steel cabinet.

Product Specifications

Absorbs	Oils - Coolant - Cutting fluids - Mild solvent - Water
Capacity	260ltr
Spill Station	118 x 64 x 58cm
Contents	100 x pads 50cm x 40cm, 20 x 1.2m socks, 1 x 50cm x 40m roll

Product Features and Benefits

- Designed to absorb hydrocarbons (oil, fuel, diesel) while repelling water, making them ideal for both land-based and water-adjacent spills.
- Can absorb up to 260ltrs, ensuring efficient spill control.
- Rotationally moulded for high durability, impact resistance, and corrosion protection.
- Suitable for both indoor and outdoor use, protecting contents from moisture and contaminants.
- Perfect for routine housekeeping and emergency spill response in high-risk areas.
- The same spill station is available in a painted steel cabinet for environments requiring a metal option.
