

## Technical Data Sheet | OSB2-100

### Oil Selective Absorbent Booms | Absorbs 100ltr Per Pack of 2

These oil-selective absorbent booms are designed to efficiently contain and absorb liquids in a variety of environments. With their white colour coding, they are easily distinguishable from water, ensuring visibility and quick identification during use. Ideal for situations involving spills or leaks, these booms provide effective liquid control and containment, making them a reliable solution in many industrial and environmental applications.

### Product Specifications

|             |                                       |
|-------------|---------------------------------------|
| Size        | 13cmØ x 5m                            |
| Absorbs     | Hydrocarbons but repels water         |
| Capacity    | 50ltr per boom - 100ltr per pack of 2 |
| Colour      | White                                 |
| Pack Weight | 6.5kg                                 |

### Product Features and Benefits

- Specifically designed to absorb oils and repel water, making them highly effective in oil spill response.
- The bright white colour ensures high visibility and easy identification, even in challenging environments.
- Made from robust materials that can withstand harsh conditions and remain functional in both fresh and saltwater.
- Easy to deploy, move, and position, providing convenient handling and installation.
- Quickly absorbs and contains oil-based liquids, preventing the spread of spills and reducing environmental impact.
