

Technical Data Sheet | OSC16-59
Oil Selective Absorbent Pillows | Absorbs 59ltr Per Pack of 16

Our oil selective absorbent pillows are the ideal solution for removing oils from water surfaces or cleaning up oil-based spills, even in rainy conditions. These pillows are designed to absorb hydrocarbons like fuel, oil, and diesel, while repelling water, making them perfect for land-based spills during wet weather or for use on calm water surfaces. Their high absorption rate ensures that spills are contained quickly and effectively, helping you maintain a clean and safe environment.

Product Specifications

Size	38 x 23cm
Absorbs	Hydrocarbons but repels water
Capacity	3.7ltr per pillow - 59ltr per pack of 16
Colour	White
Pack Weight	4kg

Product Features and Benefits

- Absorbs only hydrocarbons (such as oils, fuels, and diesel) while repelling water, making it effective in both wet and dry conditions.
- Ideal for use on both land-based spills and spills on calm water, ensuring comprehensive coverage.
- Quickly absorbs large quantities of oil, helping to minimise the spread of contamination.
- Quickly addresses oil spills, preventing environmental damage and minimizing clean up time.
