# TAMBOUR DOORS

VERSATILE, ACCESSIBLE, SECURE.

Spacefile's Tambour Doors are designed to efficiently secure valuables and sensitive information in an easily accessed and aesthetically pleasing storage system. Conveniently roll shutters up for access and back down to create a secure wall that restricts access. A unique and adaptable design allows for full integration with any of Spacefile's shelving products as well as third-party shelving.

**Standards compliant:** Lockable design complies with both HIPAA and PIPEDA security requirements

**Effortless, ergonomic operation:** Lightweight slats, torsion spring loaded, with a waist high self-activating lock and aluminum grab handle

**Durable:** Welded cold rolled steel housing, powder coat paint finish, aluminum guide rails and shaft

**Customizable:** Multiple heights and widths are available to fit virtually any cabinet

**Space efficient:** Thin aluminum guide rails enable maximum storage or filing within the system with minimal space intrusion

**Multiple lock combinations:** Removable cores and over 215 key combinations

**Variety of colors:** Multiple shutter colors and finishes available including custom
