

APPLICATION GUIDE

Cally Gel

APPLICATION OF CALLY GEL

NAIL PREPARATION

- Sanitise yours & your clients hands.
- Push the cuticles back with a cuticle pusher
- Remove any excess cuticles with cuticle nippers
- Using a 180/180 grit file, shape the nail.
- Etch the nail bed to remove any shine.
- Dehydrate & cleanse the nail bed with 100% acetone or a dehydrate product.

APPLY CALLY BASE COAT

- Apply a thin layer of Cally base coat to the middle of nail bed & push up to the cuticle (sealing the free edge)
- Cure for 60 seconds using a UV/Led lamp (if using a low heat mode, cure for 90 seconds)

APPLY FIRST COAT OF COLOUR

- Apply a thin layer of Cally gel colour to the middle of the nail bed & push up to the cuticle, make sure you cover the full nail bed (sealing the free edge). Please note - do not apply too thick, the true colour and coverage will appear on second coat.
- Cure for 60 seconds using a UV/Led lamp (if using a low heat mode, cure for 90 seconds)

APPLY SECOND COAT OF COLOUR

- Apply a thin layer on top of cured first coat of colour. making sure the colour is even & no lines, seal the free edge.
- Cure for 60 seconds using a UV/Led lamp (if using a low heat mode, cure for 90 seconds)

APPLY CALLY NON WIPE TOP COAT

- Apply a thin layer of Cally NW top coat making sure you have covered the whole nail bed, seal the free edge.
- Cure for 60 seconds using a UV/Led lamp (if using a low heat mode, cure for 90 seconds)
- This is a non wipe top coat, so no need to wipe or cleanse.
- Finish with a cuticle oil, applying just around the nail. we don't recommend to pull oil over the nail as this could result in the nail dulling.

REMOVAL OF CALLY GEL

STEP 1

Sanitise yours & your clients hands.

STEP 2

Using a 180 grit file, file off the top coat removing any shine.
(the top coat will not soak off if not removed)

STEP 3

Soak nails in 100% acetone for 10-15mins. times may vary on removal.

STEP 4

Remove nails from acetone, using a cuticle pusher or file scrape off the softened gel.
If it is still hard soak nails for longer, don't force it off as this can result in damage.

STEP 5

File the remaining gel off. ready for nail prep again.
