

THE LITTLE GUY

QUICK START GUIDE INDUCTION TOP

Using the little guy stainless steel espresso maker with the little guy induction top

4

The induction top will **beep twice** about the time the coffee should start dripping, showing you've dosed the basket perfectly. Great job!

lovethelittleguy.com

Always leave a minimum 10cm space at the back of the induction top for air flow.

1 Press the **'power'** button. A red light will appear.

2 Place The Little Guy on the large logo area of the induction top.

3 Press the **The Little Guy** button. A second red light will appear.

5 Pour your shots and begin **texturing** the milk.

6 Pour the milk. Enjoy your coffee.

7 Press the **'power'** button. The red light will disappear.

The Little Guy setting has an automated 'power cut off' at **15 minutes**, just in case you forget!

Using other cookware

Press the **'power'** button. Place your cookware on the large logo area.

Pressing the **'cook'** button will cycle through the 5 cook levels - indicated by the number of red lights.
