RING SIZE GUIDE

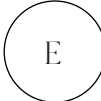

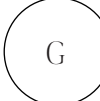

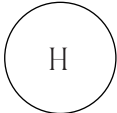

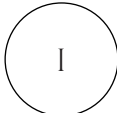

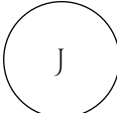

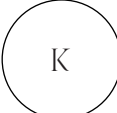

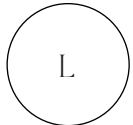

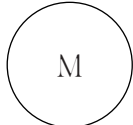

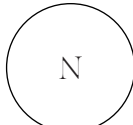

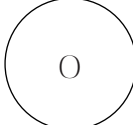

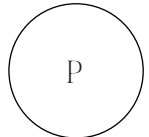

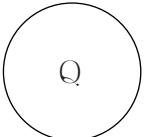

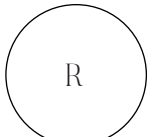

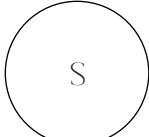

To find out your ring size, print this page and use the below ruler to ensure that the page is to scale. When printing, uncheck all 'scale to fit page' check boxes, and set the scale to 100%.

Place an existing ring (which fits on the intended finger) over the circles below, finding the one where the inside diameter of the ring matches the circle, with the circle sitting just inside the ring. If it is between two sizes, this indicates a half size. We can also resize rings to half sizes.

Use a ring which is similar in width and style, as a ring with a wide band will generally need to be a slightly larger size than a ring with a thin band.

If in doubt, visit your local jeweller who should be happy to measure your finger size.
