SHAKER AND THERMOPLASTIC DOORS

These doors are manufactured by a subcontractor and may have additional production delays. It will be up to you to return to the branch to collect them, if you do not want to wait for them to arrive before receiving your order.

Signature d'approbation : _____

EXEMPTION OF LIABILITY

Kwizine in Stock cannot be held responsible in the event of an installation problem. It is your duty to carefully check the submission and plans sent. If a product is missing or incorrect, the change must be made before completing the order.

Signature approval : _____

1. Using the grid below, draw a detailed plan of your room.
2. Accurately measure your space from corner to corner of the walls. Have someone hold the measuring tape if needed or use a laser measurement tool.
3. For each wall, indicate the distances and locations of doors and windows, in height and width (including frames).
4. Locate the existing plumbing location, the ventilation outlet of the hood, always starting from the center of them, if they cannot be moved.
5. Note other constraints such as stairs, ramps and other obstacles, if necessary.
