

PRODUCT DATA SHEET

M2 UPPER CYLINDER LUBRICANT - TANK TREATMENT NEW PACKAGING | NEW FRAGRANCES

VP Racing Fuels - M2 Scented Upper Cylinder Lubricant Tank Treatment is specifically formulated to treat your fuel and protect your fuel system and engine internals from the devastating effects of E85 and Methanol. M2 will protect all aluminum fuel systems, Valves and Guides, Cylinder Walls and is rated for Superchargers.

Our newly designed bottle has made it easier to treat your fuel than ever before. Simply pour the entire contents into 1 tank (60 Litres) of E85, Methanol or Petrol.

It is now available to purchase in 3 different unique fragrances - Bubblegum, Grape & Strawberry scent. These unique flavours are a guaranteed hit and will ensure your ride smells good on race day!

WHY DOES ETHANOL CAUSE SO MANY ISSUES?

So why is ethanol an issue?

Ethanol is hygroscopic, meaning it absorbs moisture from the air and promotes corrosion. Corrosion eats away at the vital components of your engine and fuel system. From the time of manufacture, to then being stored in a vented underground tank, there is a good chance the ethanol has been contaminated with water.

It also degrades very quickly and forms gums and varnish faster. Subsequently, you can't store it long-term.
