

REFILLISM

HOW DO I SANITIZE MY CONTAINERS?

Sanitize and Prepare Containers:

- Empty all prior product and rinse with hot water and soap.
- Option – After removing prior product and rinsing, you can put in dishwasher.
- Sanitizing Glass: Put in boiling water for at least 5 minutes.
- Sanitizing Plastic: Do a final rinse with 120 proof (60%) alcohol. This will evaporate any excess water.
- Make sure containers are 100% dry before filling.

Cleaning Tops, Pumps, and Sprayers:

- Clean and clear out all residue.
- Clean with 60% alcohol.
- Pumps: Flush out product with hot soapy water until clear of product. Then pump 60% alcohol for 10 or more pumps.

**fill containers that are
100% clean and 100%
dry.**
