JAZZ LITE RGB SYSTEM COMPONENTS

SYSTEM CONFIGURATION

SYSTEM FEATURES

RGB controller US1421/ US1521 controls up to 60 RGB modules. A data repeater is added to extend the data signal to another 60 RGB modules.

RGB controller US1421 / US1521 sends data signals to the entire RGB system, and not the individual modules. To address individual or a string of modules, you need our advance RGB systems: JAZZ Standard or JAZZ Ultra.

US1421 (RGB controller) comes with 7 fixed colors, DIY custom color is available thru the individual adjustment button for RGB LEDs. Remote key pad is included which provides additional adjustment for brightness and color changing speed.

US1521 (RGB controller) comes with 16 fixed colors and 4 changing color effects. Remote key pad is included which provides additional adjustment for brightness and color changing speed.
