## Dear Customer

We are pleased to bring you our Spring and Summer catalogue 2024 with stunning new flowers such as the Cosmos 'Apricotta' and Calendula 'Apricot Surprise' which are new to Stocks & Green inspired by this year's Pantone colour of the year Peach Fuzz.

Customers love our extensive flower seed range but we're often asked for more vegetable seeds. So we've listened and have introduced even more new varieties into the range this Spring and you will find our best selling carrots on page 9 (Carrot 'Rainbow').

We have a wide choice of vegetables available - don't forget you don't need a dedicated kitchen garden to grow food in your garden. They can be fitted into the flower borders or grown in pots or containers and add great flavour and fresh produce to your diet.

We are keen to encourage everyone to include a few wildflowers in their garden, most are easy to grow and great for attracting wildlife and pollinators to your garden. See our selection on page 58.

We are a small independent business based in the beautiful Essex countryside and really do appreciate every single order.

Thank you & happy growing!

# Flowers

## Our flower seed A-Z

On the following pages you will find our A-Z of flower seeds. Annuals are a quick and easy way to bring colour into your garden - flowering the same year as sown, they allow you to plant a different selection each year. Meanwhile, biennials flower in their second year of growing. Perennials are popular for the 'lower maintenance' gardener as they are hardy and return year after year. You will also find a great selection of climbers, cutting flowers, bee-friendly plants and even edible ones to brighten up a salad.
