

CONDOM SIZING GUIDE

www.ltchealthcare.co.uk

Sex can be uncomfortable if you don't have the right condom fit.

Condoms that are too big or too small can slip off of your penis or break, increasing the risk of pregnancy or disease transmission. It could also affect your ability to orgasm. That's why knowing your condom size is important for safe and pleasurable sex.

LTC STEP BY STEP MEASURING GUIDE

1. Cut off the LTC measuring tape on the dotted line
2. Carefully place the measuring tape on the widest part of the erect penis. See the recommended width at the arrow.

IMPORTANT: Be careful of sharp paper edges when cutting off the tape

3. An initial recommendation - try out different sizes and this width. It's about your sensitivity levels - and what you want

We Recommend	
	69mm - EXS Jumbo
	60mm - EXS Magnum Large
	56mm - EXS Air Thin
	54mm- EXS Regular, Cooling, Warming, Smiley, Flavoured, Black Latex,
	53mm- EXS Nano Thin, Glow in the Dark, Delay
	49mm- EXS Snug Fit
