

BiRod

Proven solution for safe aerial photography without using a drone.

"Bi Rod" is the long monopod for filming from the angle you have never seen so far. With an action camera with Wi-Fi function and smartphone, the captured scene is at your hand. With "Bi Wireless Line", the unique underwater antenna, you can monitor the marine life. Experience a unique perspective with Bi Rod.

How to use

1 Take out the Bi Rod from the case.

2 When using a tripod, place the tripod on a level surface.

3 Set your camera on Bi Rod securely.

4 Connect your camera to your smartphone via Wi-Fi function.

5 Extend Bi Rod to the appropriate length.

Ready to shoot
in 5 minutes!

Compatible with various cameras

Any cameras that can be connected to mobile device via Wi-Fi function can be used.
