

Rawhide Mat Grade Comparisons

Our mats are one of the highest quality mats on the market and are perfect for home and outdoor use! They are custom built for the sole use of one supplier. After one year of sheltered use, we then receive them for processing. They are a 60" X 60" (5ftX5ft), with a 1/2" foam underlayment and a 1" thick turf. Each mat is fully cleaned, sanitized, and vacuumed before being carefully graded out by two of our team members. Wooden tees play great anywhere on the turf of these mats.

Grade A+ (Almost New) mats are nearly perfect - a rare find! All rubber tee holes are in great shape. The body of the mat turf shows very little wear.

Grade A (Very Good) mats may show some turf wear (canoeing or scalping) over one tee hole. The body of the mat turf will show minimal wear. mats may show some turf wear (canoeing or scalping) over one tee hole. The body of the mat turf will show minimal wear.

Grade B (Lightly Used) mats may show some turf wear (canoeing or scalping) over two tee holes. The body of the mat turf may show a little wear.

Grade C (Slightly More Used) golf mats may show some turf wear (canoeing or scalping) on three or all four of the rubber tee holes. The body of the mat turf shows more traffic wear than a B, A, or A+ mat.

Grade D (Very Used) mats have been through it, but are still very playable! They're a lot like our "C Grade" mats, except a few of the tee holes may be enlarged, with little turf around the hole. The tee holes that are missing turf will show the shock underlayment. The body of the mat will show wear.

These mats are great for high school golf teams, baseball, golf youth organizations, cushioning for a workbench, cutting for mat strips, or even as a green space for pets!
