

DON'T GET GOT

WORKING FROM HOME EDITION

A secret missions game to play at home, while you work

2-6
players

Work can be tough – even when you're sitting on the sofa. Luckily, we've got just the thing to help brighten up your virtual office. A mini game designed to be played with your workmates, while you work from home.

You and your co-workers each start with six secret missions. The first player to complete three of their missions, wins.

Every single one of these missions involves tricking another player, and they're all based around video conference calls. So, whether you're in a 10 person Zoom meeting or a one-on-one Skype session, you better bring your A-game. There's no telling what might be on the agenda.

HERE'S HOW TO GET STARTED

- 1.** If you're reading this, then congratulations – you're now in charge of setting up the game.
- 2.** Download the six different player files but **DO NOT OPEN THEM**. If you look at any missions that aren't your own, then you'll ruin the game for everyone.
- 3.** Instead, send each pack to a different colleague, keeping one for yourself.
- 4.** Once everyone's received their pack, you can safely open **your** missions and start scheming.
