

Electric Kids Mini Quad ATV

PLEASE BE SAFE WHEN RIDING ALWAYS WEAR A HELMET AND OBEY ALL LAWS!

BATTERY MAINTENANCE and CHARGING INSTRUCTIONS

1. You **MUST** charge completely prior to initialuse.(Follow charging instructions in your Product Handbook)

- 2. Charge immediately after each use.
- 3. Charge before storage. You mus tcharge every 30 days if not in use.

4. Charge the unit for 6-8 hours or until the light on the charger turns red & green.

- 5. **DO NOT** allow this unit to deep discharge the battery.
- 6. For safety purposes, **DO NOT** charge for over 24 hours.
- 7. Turn the unit **OFF** when not in use.

Failure to follow these INSTRUCTIONS will <u>VOID YOUR WARRANTY!</u>

This PRODUCT IS NOT INTENDED FOR EXTREME Use!

Please take care of your motorcycle.

DO NOT JUMP or ABUSE THIS PRODUCT!

DO NOT RIDE IN WET/ICY CONDITIONS!

Failure to follow these instructions properly or abusing your motorcycle will <u>VOID YOUR WARRANTY!</u>

IMPORTANT

PLEASE READ BEFORE USING THIS PRODUCT READ THIS FIRST!

WARNING

This product does not conform to Federal Motor Vehicle Standards and is not intended for operation on public streets, roads or highways. Serious injury can result from the unsafe operations of this product. Operator can minimize these risks by using certain safety equipment such as: safety helmet, goggles, gloves, elbow and kneepads and appropriate footwear.

DO NOT operate this product in traffic, on wet, frozen, oily or unpaved surfaces or under the influence of drugs and/or alcohol. Avoid uneven surfaces, potholes, surface cracks and obstacles.

DO NOT use a water hose to clean this product. See Product Handbook for more information.

This product is recommended for riders <u>8 YEARS OF AGE and older.</u>

SAFETY

- Persons without excellent vision, balance, coordination, reflex, muscle and bone strength and good decision-making capabilities should not use this product.
- Minors without adult supervision should not use this product.
- Persons unwilling or unable to take responsibility for their own actions should not use this product.

• The user of this product assumes ALL risks associated with its use. To minimize these RISKS, the user must wear appropriate safety gear such as helmet, goggles, gloves, elbow and kneepads and appropriate footwear.

• THIS PRODUCT IS ELECTRIC! DO NOT RIDE THIS PRODUCT IN WET CONDITIONS, PUDDLES OR RAINY WEATHER.

QUICK REFERENCE SAFETY GUIDE

SAFETY GUIDE

- The recommended minimum age for riding this E-ATV is 8 years old.
- To avoid damage to the motor and footplate, do not overload the E-ATV.
- Never ride with more than one person.
- Inspect your E-ATV thoroughly before each use for loose or missing parts.
- Avoid unintentional starts by turning the E-ATV off while not in use.
- To avoid the risk of a short circuit in the electrical parts, do not use your
- E-ATV in the rain and never spray or wash off your E-ATV with water.
- Do not place the battery near fire or heat.

• To avoid damage to the battery, do not use the charger if it has been damaged in any way.

- Keep hands, face, feet and hair away from all moving parts.
- Do not touch the motor or wheels while they are rotating.

• Brakes are designed to control speed as well as stop the E-ATV. Practice braking

for proper slowing down and smooth stops.

- Maintain your E-ATV as recommended in this Product Handbook.
- Use only quality replacement parts as recommended by the manufacturer.
- Inspect the entire E-ATV prior to each use. Replace any part that is cracked, chipped or damaged before use.

*NEVER ALLOW CHILDREN TO OPERATE THE E-ATV WITHOUT ADULT SUPERVISION.

*NEVER ATTEMPT TO OPERATE THE E-ATV WHILE UNDER THE INFLUENCE OF ALCO-HOL.

If a situation arises that is not covered in the manual, proceed with caution and use good judgment.

Contact your dealer if you need further assistance

05Package Contents

Your E-ATV comes with the following items in the box. Please locate all of the following:

- 1. E-ATV
- 2. Battery Charger
- 3. Tool Kit ,User Manual and Fuses

GETTING STARTED

Please read and understand these instructions and the **<u>OPERATING</u> <u>PROCEDURES</u>** section, prior to starting or riding your E-ATV

06Assembly

- 1. Carefully remove the E-ATV from the box.
- 2. Setting up handle bar
- 3. Insert the fuse into the fuse holder with engine off, the fuse holder is
- in the left side of the E-ATV, see pictures below:
- 4. When insert the fuse into fuse holder, it may produce minor spark.

07Charging

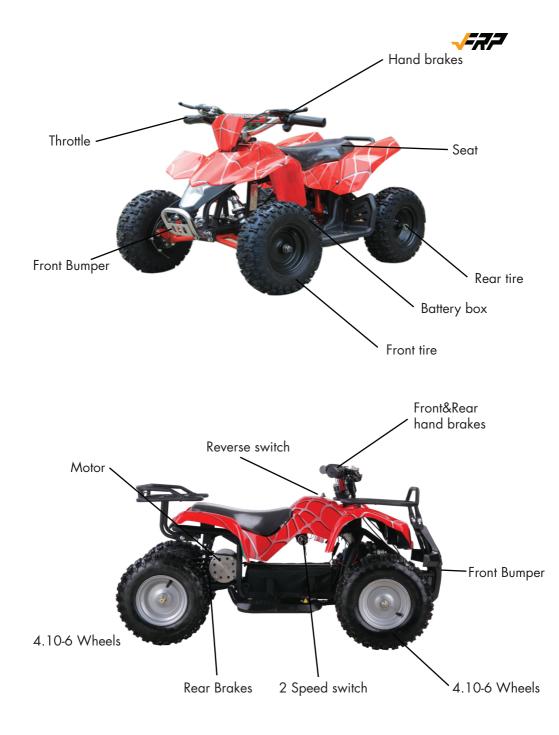

- Your E-ATV comes charged out of the carton.
- We still recommend charging the unit for 6-8 hours prior to its first use.

• We also recommend charging your E-ATV after each use and prior to storage.

08Getting to know your electric mini ATV

09 Warning

Do not allow your E-ATV to go into deep discharge, as this will damage the batteries.

 Make sure unit is turned off.
 Open the charging socket cover located on the left side of the E-ATV frame, near batteries
 Locate your Battery Charger.
 Find the charger socket and that has a three-prong socket and plug it into the E-ATV .

4. Next, plug the AC plug into a wall outlet.

10Charging

When first plugged in, the charger has one red light that will illuminate at the same time, indicating that the charging process has started. Once the light on the charger turns red & green, you may remove the charger and close the safety cap.

11 Riding

1. Make sure that all of the exposed bolts and screws are tightened.

2. Push the on/off switch to the ON position.

3. Chose the proper speed via speed control switch

4. Gently rotate the THROTTLE GRIP, on the right side of the handle-

bars. The E-ATV will begin to move on its own power.

**Your E-ATV has a variable speed hand throttle. You can control the speed of your E-ATV by the amount of pressure you use when rotating the hand throttle. The more you rotate, the faster you will go. Or you can change the speed by the 2 speed switch or 3 speed switch which at the right of ATV.

12Stopping & Braking

1. Tobrake, release the THROTTLEGRIP and depress the-

BRAKELEVERS (on the left/right side of the handlebars. Depressing the brake will disengage power to the motor. When the unit feels like it is losing power or not accelerating to full speed, the E-ATV is ready to be re-charged.

13Braking System

• The E-ATV uses a disc/caliper system .It is activated by a hand brake lever on the left and right side of the handlebar.

• Squeezing the hand brake lever with your left hand activates the rear brake.

• Squeezing the hand brake lever with your right hand activates the front brake.

• Make sure to release the HAND THROTTLE GRIP when engaging the brakes.

• Your E-ATV is equipped with switches on each brake lever that will disengage power to the motor when the brake levers are depressed.

Practice braking on a smooth, dry surface to get used to the feel of the braking system. Braking distance is affected by wet conditions and loose and uneven riding surfaces.

14Adjusting the Brakes

The Brakes on the E-ATV should come fully adjusted from the factory. However, it may be necessary to adjust the brakes from time to time.

To adjust the rear brakes:

For brakes that are adjusted too loose:

1. Adjust the tension screw on the right hand brake lever by rotating it counter-clockwise until the wheel spins freely.

For brakes that are adjusted too tight:

2. Tighten the tension screw on the right hand brake lever by rotating it clockwise until the wheel has a slight drag.

SQUEAKY BRAKES

The brakes may squeak before they are broken in. This is normal and will not affect the function or performance of the brakes. With continued use the squeak should go away.

15 Tire Pressure

The tire must be inflated to a maximum of 20 P.S.I(4.10-6. It is also recommended to use a tube additive like Slime, available from any motorcycle shop, to avoid inconvenient punctures.

<u>Empty all air from the tire</u>, prior to loosening the bolt to split the rim.

16Maintenance Schedule

Proper care of your E-ATV will insure optimal performance and longer life span. The following are a few maintenance suggestions that will keep your E-ATV running in top condition:

Daily Maintenance

Perform each time you ride your E-ATV

- Clean the exterior of the unit with a soft, damp rag. (DO NOT WASH WITH A HOSE)
 - Check that all nuts and bolts are securely tightened.

• Lubricate the chain with any silicone spray, 3:1 oil or any good clean motor oil.

• Check battery charger for any frayed/cut wires.

17 Troubleshooting Guide

SYMPTONS	POTENTIAL CAUSE	SOLUTION
The charger light turns green & red right away	 Thisindicatesthe batteries are adequately charged. BadFuseoropen connection between charger socket and batteries. 	 Continueto charge the batteries for 6-8 hours prior to initial use. CheckFuse: Look for loose or discon- nected wire
Batteries do not hold a charge. Unit does not have specified travel range.	 Batterieshave reached the end of their useful life. Chargeris malfunc- tioning. 	1. ReplaceBatteries 2. ReplaceCharger Unit.
Unit moves intermittently or very slow.	 Batteriesnotfully charged. LooseWire. BadThrottleor controller. 	 Chargeor replace batteries. Checkforloose wires Replace
Unit will not move when throttle lever is activated.	 Batteriesnotfully charged. Brakeswitchesoutof adjustment Batterieshave reached the end of their useful life. 	 Replacebatteries or charger. Loosenbrakes Replace batteries.
Unit stops abruptly during use.	1. FuseBlown 2. Looseorbrokenwire.	 ReplaceFuse Checkforloose or broken wires and repair/replace.
