IT'S NOT JUST PLASTIC IT'S A WAY OF LIFE...

3 GENERATIONS OF PLASTIC-WRAPPED JOY!

You can be sure of one thing, when you enter Bubbles Plastics – you're not just buying a plastic container, jar or bag – you're buying a jolt of happiness wrapped in plastic. We feel for you when you're spring-cleaning and need a spot for that tangled mess of cords, appliances or cutlery. Or maybe it's the kids' pens, pencils & crayons. Often, it's a business owner looking for quality bags to wrap their customers' store purchases. At Bubbles, we've been solving problems like these for our customers since 1976! For three generations, our patrons in Rustenburg have relied on us for all kinds of bags, racks, buckets and other plasticware to keep their lives tidy and organised. Mothers come to us with their kiddies' back-to-school shopping lists. Businesses come to us to source fully-customised, branded plastic bags. Dads come to us to find the perfect toolbox or cooler-box. We enjoy nothing more – than having you walk out with the solution you came looking for. It's what keeps us ticking year after year. And drives us to improve our offerings so we remain Rustenburg's #1 choice for plastic!

FULLY-STOCKED, SPACIOUS STORE, DIRECT FROM THE FACTORY

Our store located at Bubbles Business Park – 11 Cobalt St, Industria, is a short drive from the Rustenburg CBD. The fully-stocked, spacious shop more than makes up for the trip. Inside you will be greeted by our knowledgeable, friendly crew – who are always happy to lend a recommendation or two. No question is too small or too big for us. We're here to welcome and assist you with any problem. Together, we'll find the perfect solution.

EXPERT ADVICE FOR YOUR NEXT EVENT OR PARTY

Gifts, paper cups and plates, kiddies' chairs and party supplies–It's all under one roof at Bubbles Plastics. Find all you need to pull off a great party, in one place!

CLEANING & SANITISING PRODUCTS

Stay clean, sanitised and virus-free with our range of cleaning products. We stock household detergents and sanitisers at factory prices. They're available in bulk packs or regular sizes for home use.

BORN & BRED IN RUSTENBURG

As a successful local business, we're committed to giving back to the community that has supported us for over 40 years. Schools find us a captivating excursion trip. Young kids get to peek inside a real factory, wide-eyed as they witness a plastic bottle transform from granules into the familiar shapes we're used to. Undoubtedly, some of these kids will be inspired to become our future entrepreneurs and engineers. We're humbled to be involved in such projects and other educational initiatives to give back to our community.

Visit us at Bubbles Plastics today! Follow us on Facebook & Instagram to stay updated on our special deals and new arrivals, or skip the queue completely – we'll deliver to you when you shop online at bubblesplastics.co.za

*We also make any size according to your specifications.

Plastic shopping bags, carrier bags or plastic grocery bags are a type of plastic bag used as shopping bags and made from various kinds of plastic. In use by customers worldwide since the 1960's, these bags are sometimes called single-use bags, referring to carrying items from a store. However, reuse for storage or trash is common, and modern plastic shopping bags are increasingly recyclable or biodegradable.

We manufacture carrier bags of all sizes, strengths & colours to cater for your needs.

We print your company's logo or brand in the exact design specifications you require.

MERCHANDISING BAGS

6767	LDPE-SHEETING: 2mx100mx150MIC	Per Mtr

*We also make any size according to your specifications.

Plastic sheeting or drop sheets are most commonly used in the building industry.

The low density poly material promotes durability and flexibility in our poly sheeting. It is often used as vapour barriers in construction, for drop cloths, traps, as well as lining for a variety of projects.

TUBING

1520	LDPE-550x1200x25MIC	100s

*We also make any size according to your specifications.

Typically made from polyethylene or other plastic film, produce bags are used for consumer in-store packaging of fruits and vegetables. Do not use them for cooking; the thin plastic may melt or burn. Although it is safe to freeze food in them, the plastic is very thin and the food could get freezer burn.

While they often look and feel pretty similar to other plastic storage bags, freezer bags are slightly thicker than regular bags. This translates into a storage bag that is sturdier and more durable. As a result, freezer bags keep food fresh for longer periods of time and prevent or slow freezer burn.

BILTONG BAG

BILTONG BAG

64892	HDPE-75x95x20mic:REF/XLIGHT	20s

Plastic bags are often used for lining litter or waste containers or bins. This serves to keep the container sanitary by avoiding container contact with the garbage. After the bag in the container is filled with litter, the bag can be pulled out by its edges, closed, and tied with minimal contact with the waste matter. Refuse Bags are available in various colours: Black, Clear, Red, Yellow, Green & more.

DROP SHEETS

Used to cover floors prior to painting for protection from paint spills. Also used to protect furniture left in the room when painting

ICE BAGS PLAIN & PRINTED

ICE BAGS PLAIN & PRINTED		
CODE	DES OR SIZE	PACKAGING
1573	LDPE-250X450X100MIC	100s
1569	LDPE-300X650X100MIC	100s
1570	LDPE-360X800X100MIC	100s

For all your freezer bag applications. These heavy-duty bags provide exceptional strength and are made using a production process that yields an ideal balance of strength and balance and cold storage capabilities.

INDUSTRIAL BAGS PLAIN AND PRINTED

A wide variety of bulk bags used in industries that include the mining, agricultural, chemical, mineral processing and food sectors.

GREEN GARDEN BAGS

GREEN GARDEN BAGS

Plastic bag for garden waste.

PLASTIC TABLE CLOTHS

PLASTIC TABLE CLOTH S		
CODE	DES OR SIZE	MTR
63135	PVC-TABLE-COVER-ASSORTED	PER MTR

*We also make any size according to your specifications.

Plastic tablecloths, also known as PVC tablecloths, are long-lasting and very practical. Simply wipe clean with a damp cloth and your tablecloth will look as good as new. They are a great way to save time and effort as, unlike a linen tablecloth, they do not need to be washed and ironed. Wide range available.

Whether you manage a nursery or greenhouse, or you're cultivating your own green thumb at home, work, church, or the kids', school, you need to know about plastic plant bags - otherwise known as grow bags

Plastic plant bags are quickly becoming the most popular plant-potting medium, and for good reason. In the end, you can save yourself money and space, help the environment, and potentially grow healthier, harder plants!

When it comes to nursery bags, durability is key.

A zipper storage bag, slider storage bag, zipper bag, or zippie is an inexpensive flexible rectangular storage bag, usually mainly transparent, made of polyethylene or similar plastic, which can be sealed and opened many times by a slider which works in a similar way to a zip fastener. The bags are made in many sizes; a typical small size is 3.8 cm x 6.4 cm, and a typical large size is 23 cm x 30 cm. Material thickness (gauge) varies.

Many such bags are used to contain food stuff, such as sandwiches and freezer items. Single and multiple small items for sale are often packed in small zipper bags for convenience and visibility

*We also make any size according to your specifications.

Perfect for bilting as they allow the product to breathe & avoid moisture absorption, keeping the product fresher for longer.

The Effects of Plastic Bags on The Environment

The effects of plastic bags on the environment are really quite devastating. While there are many objections to the banning of plastic bags based solely on their convenience, the damage to the environment needs to be controlled.

There is no way to strictly limit the effects of plastic bags on the environment because there is no disposal method that will really help eliminate the problem.

While reusing them is the first step, most people either don't or can't based on store policies. They are not durable enough to stand up to numerous trips to the store so often the best that citizens can do is reuse them when following pooper scooper laws.

The biggest problem with this is that once they have been soiled they end up in the trash, which then ends up in the landfill or burned.

Either solution is very poor for the environment.

Burning emits toxic gases that harm the atmosphere and increase the level of VOCs in the air while landfills hold them indefinitely as part of the plastic waste problem throughout the globe.

Plastic Bag Litter

Even when citizens try to manage their plastic bag disposal wind plays a role in carrying them away as litter.

This litter is not biodegradable and thus where it lands it tends to stay for long period of time. A bag that is eventually ripped to shreds from high winds or other factors doesn't disappear but instead is spread in smaller amounts throughout the area.

This can cause more problems as these smaller pieces are carried away through storm drains and often end up in the waterways.

Plastic bag litter is often also the result of human laziness and the effect of plastic bags on the environment are grossly misunderstood.

The plastic bag might make for a good carry on to the beach for the day but once all of the pretzels and chips are consumed an estimated one in three consumers simply allow the bag to disappear into the wind and waves.

With more than 500 billion and possibly as many as a trillion plastic bags in circulation annually this can lead to a catastrophic littering problem.

Not only is littering unattractive but it is also a very serious environmental hazard.

The Effects of Plastic Bags in Waterways

One of the greatest problems is that an estimated 300 million plastic bags end up in the Atlantic Ocean alone. These bags are very dangerous for sea life, especially those of the mammal variety.

Any hunting mammal can easily mistake the size, shape, and texture of the plastic bag for a meal and find its airway is cut off.

Needless deaths from plastic bags are increasing every year.

Porpoises are the most common victim.

Because they eat sea nettles and jelly fish they are the most likely to mistake the plastic bag for food.

If they survive the swallowing of the bag, it is unlikely that they are able to continue with normal digestion and thus eventually

die a slow and painful death from toxicity or intestinal blockage.

The Effects of Plastic Bags on Land

The indefinite period of time that it takes for the average plastic bag to breakdown can be literally hundreds of years.

Every bag that ends up in the woodlands of the country threatens the natural progression of wildlife.

Because the break down rate is so slow the chances that the bag will harmlessly go away are extremely slim.

Throughout the world plastic bags are responsible for suffocation deaths of woodland animals as well as inhibiting soil nutrients.

The land litter that is made up of plastic bags has the potential to kill over and over again.

It has been estimated that one bag has the potential to unintentionally kill one animal per every three months due to unintentional digestion or inhalation.

If you consider the number of littered plastic bags ranges from 1.5 million to 3 million depending on location, this Equals a lot of ecosystem sustaining lives lost.

Recycling Plastic Bags

While it's a noble thought to place the plastic bags in the recycling bin every week, studies have proven that there are very few plants that actually recycle them.

Most municipalities either burn them or send them off to the landfill after sorting.

This is because it can be expensive to recycle this type of plastic.

It doesn't melt down easily and is often not realistically able to be reused from its original form without considerable overhaul to the facility. The premise of recycling these bags is nice.

Yet funding for the upgrades just has not happened and thus less than 1% of all bags sent to recycling plants world wide end up in the recycling project.

Most are left to become a pollution problem in one way or another

Alternatives to Plastic Bags

There are always alternatives to plastic bags and the search for more alternatives continues.

Paper bags are a possible option but they also take their toll on the environment.

The use of trees to increase the production of paper products combined with the increased energy that's required to make paper bags will also have a negative environment effect.

Reusable plastic bags are being introduced to regions that want to outlaw the plastic bag altogether.

These are stronger and more durable and can be used for three to five trips to the store

It is crucial that societies start properly understanding the effects of plastic bags on the environment and learning to create sustainable ways to deal with them.

Of course, the reusable cloth bag is fast becoming a favorite among environmental supporters.

While thus far no bag is without its issues these are the bags that are currently recommended for use to help protect environmental concerns.
