

juice MAX

20,000mAh powerbank

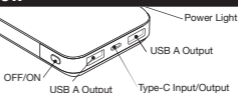

Juice® has built the **Juice@MAX** power bank with you in mind. Speed is important when charging and when on the go, the **Juice@MAX** will charge your device at super fast 20W and will allow around 7 full charges of an average mobile. This handy charger will also charge **THREE** devices at the same time, ready for when you need it most.

- USB C Input port
- 2 x USB A Charging ports - Output (18W)
- USB C Charging port - Output (20W)

Contents

Juice@MAX power bank, USB-C to USB cable (for charging) and User Manual

Overview

Note: Click the OFF/ON button once to turn the **Max** on, Double Click to turn it off

How to charge the Juice@MAX power bank

Ensure to fully charge the **Juice@MAX** power bank before first use, the LED will display four lights. Do this by charging and draining the power bank 3 to 4 times, this will ensure the **Juice@MAX** is fully optimised. To charge the **Juice@MAX** simply connect the supplied USB-C cable into the power bank and the other end into your computer or to a mains plug (plug not supplied). The LED will flash when charging, the LED will turn white when fully charged.

Checking the remaining charge

Charge Time: **6.2hrs** (DC5V, 3A input)

To check the energy levels press the button on the side, the LEDs will indicate the remaining power.

Note: It is normal for the **Juice@MAX** and your device to get warm during charging. They may get even warmer if you use your device to play videos or for gaming while charging.

Charging your gadgets

Always check the voltage your device can accept before charging with any Juice product, this will ensure full compatibility

1. Connect your device via the cable to the USB A or USB C port. You are able to charge from three output ports at the same time but the speed of charge will decrease for optimum safety. For other devices and Apple devices you will need to use your original cable that was supplied with your device, this will ensure compatibility.
2. Press the power button to turn the **Juice@MAX** on, now you can charge. Your device will show you when it is being charged via a sound or on the screen. The number of lit LEDs will decrease to show that power is being transferred from the power bank to your device.
3. When your device is fully charged or you want to stop charging, disconnect the cable.
4. In order to charge your device(s), you will need a cable compatible with your device. These come included as standard when purchasing most devices. Plug the device's standard USB A end in to the **Juice@MAX**, then plug the other end of the cable into the device you wish to charge.
5. Once charged, simply unplug your device and store your **Juice@MAX** power bank until you are ready to use it again, ensure to charge the power bank fully every 3 months to ensure it is kept in optimum condition.

NOTE: Mobile and gadget device manufacturers have different requirements to charge their products, they may also use different cables to charge their devices. These manufacturers may vary the specifications of how to charge a device and they may also introduce other charging methods on their new products, therefore we can not guarantee that the **Juice@MAX** power bank will be able to charge all devices. Juice® always suggests that you use the original charging cable included with your device to charge.

Made from 100% recycled plastics

11% of the material on this product is made from recycled post consumer waste plastic.

Lets get techy

Input	USB-C - DC5V/3A, 9V/2A, 12V/1.5A
Output	2 x Outputs USB A: DC5V/3A, 9V/2A, 12V/1.5A(max 18W) Output USB C: DC5V/3A, 9V/2.22A, 12V/1.67A(max 20W)
Dimensions	140 x 68 x 26.5 mm
Net Weight	342g
Capacity	20,000 mAh / 3.7V / 74Wh (Lithium polymer battery cell)
