

juice® MagTec² 5,000mAh powerbank

POWER BANK

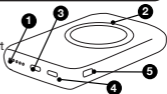

The Juice® MagTec Wireless Charging Power Bank magnet will lock into place and secure the bank to the back of your iPhone 12 (or newer model) for wireless charging. **MagTec#2** is compatible with all phones via its USB C port and will allow around 2 full charges of an average mobile. You can also charge TWO devices at the same time, ready for when you need it most.

Contents

MagTec#2 power bank, USB C to USB A cable (for charging) and User Manual

Overview

1. LED indicators
2. MagTec charging ring
3. USB C input/output charging port
4. USB C input port
5. Power button

How to charge the MagTec#3 power bank

Ensure to fully charge the **MagTec#2** power bank before first use, the LED will display four lights. Do this by charging and draining the power bank 3 to 4 times, this will ensure the **MagTec#2** is fully optimised. To charge the **MagTec#2** simply connect the supplied USB C cable into the power bank and the other end into your computer or to a mains plug (plug not supplied). The LED will flash when charging, the LED will turn blue when fully charged.

Checking the remaining charge

Charge Time : 4 hrs (DC5V, 3A input)

To check the energy levels press the button on the side, the LEDs will indicate the remaining power.

Note: It is normal for the **MagTec#2** and your device to get warm during charging. They may get even warmer if you use your device to play videos or for gaming while charging.

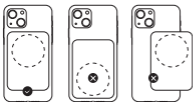

Charging your gadgets

Always check the voltage your device can accept before charging with any Juice product, this will ensure full compatibility

1. Connect your device via its cable to the USB C port. You are able to charge from the output port & the MagTec ring at the same time but the speed of charge will decrease for optimum safety. Charge your devices with your original cable that was supplied with your device, this will ensure compatibility.
2. Press the power button to turn the **MagTec#2** on, now you can charge. Your device will show you when it is being charged via a sound or on the screen. The number of lit LEDs will decrease to show that power is being transferred from the power bank to your device.
3. When your device is fully charged or you want to stop charging, disconnect the cable or remove your phone from the Mag ring.
4. While using magnetic wireless charging, the 5th LED indicator will shine blue to show it is in use.
5. Once charged, simply unplug your device and store your **MagTec#2** power bank until you are ready to use it again, charge the power bank fully every 3 months to ensure it is kept in optimum condition.

Charging your iPhone 12 & Newer with MagTec

Position your **MagTec#2** in the central area on the back of your phone and allow the magnets to lock on, the phone will begin to charge.

Note:

Other mobile phones that support wireless charging can be charged by placing the MagTec#2 flat on the table/desk and positioning the central area of the back of the phone onto the MagTec Ring

Note:

The effectiveness of the magnetic connection is weakened when using with a protective phone case. Only original iPhone MagSafe® cases guarantee compatibility with the magnets in the MagTec Wireless Charger. Third-party magnetic cases can't guarantee full compatibility.

Made from 100% recycled plastics

19% of the material on this product is made from recycled post consumer waste plastic.

Lets get techy

Input	USB-C - DC5V/3A x 2
