step by step plan for your

## TRANSPARENT STICKER

### Checklist

- Wall Sticker
- Clean Surface
- Scissors
- Helping hands

In 4 easy steps your Roomblush sticker on your wall!  
Your sticker adventure starts here and now. Ready for it?

01

### Unpack the sticker

Take the sticker out of the packaging and lay it open on a flat, clean surface such as the kitchen table.

To stop it from curling up, you can place some heavy books on the ends. This will make the placement of the sticker on the wall, window or door easier.

Is your sticker damaged or did you notice a mistake? Then take some pictures and send them to our customer service via via [info@roomblush.com](mailto:info@roomblush.com).

02

### Prepare your wall

Make sure the surface meets the following conditions:

- o Smooth, without holes or other imperfections
- o Dry
- o Dust free
- o Free of grease

We recommend that you always dust the surface again before applying your sticker. You can do this with a clean cloth or towel.

03

### Remove excess foil

To ensure the quality of your sticker, there may be excess foil between the different stickers. It is best to remove it in advance to facilitate the placement of your sticker.

#### Roomblush Tip:

- Start by removing the excess foil from one of the corners. Meanwhile, hold the sticker with your hand when removing the foil around fine cut lines.
- More than 2 stickers on 1 paper? Cut out the stickers after removing the excess foil to make the placing easier.

04

### Apply your sticker

Start from one of the top corners. Loosen part of the sticker from the paper and place it on your wall. Press the sticker down firmly with your hand to prevent air bubbles.

Gradually remove the rest of the paper and press the sticker further with your hand or wallpaper spatula.

Still an air bubble in your sticker? Remove the sticker carefully and place it back on your wall, window or door. Press firmly.
