step by step plan for your

VLIESTICKER

Checklist

- Wall sticker
- Clean surface
- Scissors
- Helping hands
- Painter's tape*

In 4 easy steps your Roomblush sticker on your wall!
Your sticker adventure starts here and now. Ready for?

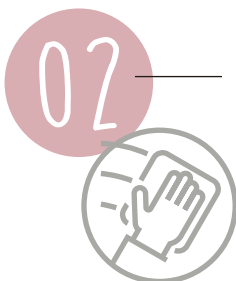

Unpack the sticker

Take the sticker out of the packaging and lay it open on a flat, clean surface such as the kitchen table.

To stop it from curling up, you can place a few heavy books on the ends. This will help place the sticker on the wall, window or door easier.

Is your sticker damaged or did you notice a mistake? Then take some pictures and send them to our customer service at info@roomblush.com.

Prepare your wall

Make sure the surface meets the following conditions:

- o Smooth, without holes or other imperfections
- o Dry
- o Dust free
- o Grease-free

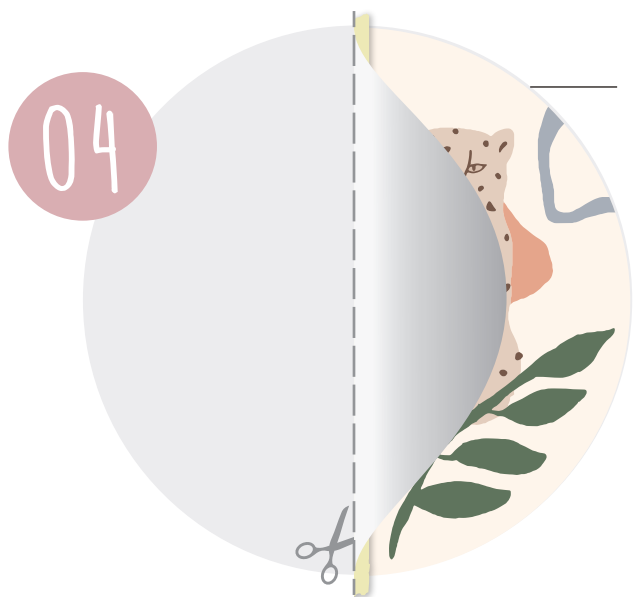

We recommend that you always dust the surface again before applying your sticker. You can do this with a clean cloth or towel.

*tape that won't damage the surface

Find the right position

- Before effectively attaching your sticker to your wall, door or window, you can test out the position using painter's tape.
- Take a piece of tape the size of the cross section of your wall sticker.
- Use the piece of tape to position the sticker on your wall. Place the tape vertically in the center of the circle (see drawing).

Place your sticker

Detach the left half of your sticker from the paper and fold the sticker over to the right side.

Cut the paper on the left side. Fold the left side of the sticker back over to the left side and press firmly from the center. You can use your hand or a wallpapering spatula.

Left side ready? Now remove the paper on the right side and place the rest of the sticker.

Roomblush Tip:

Still an air bubble in your sticker? Remove the sticker carefully and place it again on your wall, window or door. Press firmly.
