## 2 · 0 · 2 · 2 COLOR CARD

We make every effort to keep our dye lots consistent. However, there are many variables in the process that we cannot control: dye sources, computer monitors, individual perception of color, lighting, etc. Please order amounts needed at the same time to ensure it is from the same dye lot.

Please take into account that many colors are very similar and may appear to be the same color in different lighting. Tiny flecks (cotton seeds) and bumps are a natural characteristic of the unbleached muslin base. Slight irregularities in the suede texture are a result of human involvement in the process and are a hallmark of handcrafted products.

### THE BEACH COLLECTION

Dyed on a white base, these colors are light and airy. The bleaching process removes any cotton seed residue, and also makes the fabric slightly thinner than our regular yardage. The suede look may not be as prominent because of the lighter colors. Products named with a "W" before the number indicates that the color is dyed on a white base.

**DISCLAIMER:** It is impossible to capture the true nature of fabric in print. This color card was created by scanning fabric swatches, color correcting the digital images and professionally printing.

## THE BEACH COLLECTION - "Bleached Dyed" Cotton

In order to achieve lighter, more clean colors, this collection is dyed on a bleached muslin.

The dyeing technique is exactly the same, but the suede texture may not be as prominent because of the light colors.

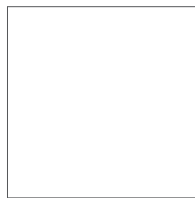

W1 White

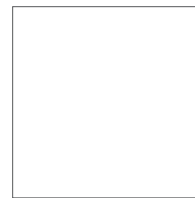

W2 Lily

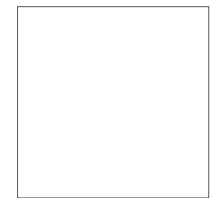

W3 Pineapple

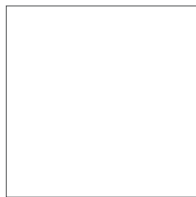

W4 Cheesecake

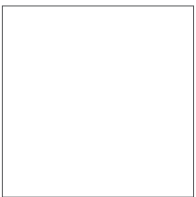

W5 Mint

W6 Saltwater

W7 Icecube

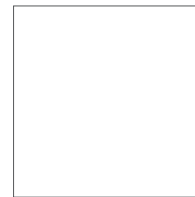

W8 Tutti Fruity
