iDVD on Lion OS X does not exist. Since iDVD is no longer offered on Mac OS X Lion, what to do when you want to burn videos to DVD on Lion? No worry! An iDVD for Lion alternative can be the best helper for you.

My recommendation is iSkysoft DVD Creator for Mac (now fully supports macOS High Sierra). It's a great DVD burning application similar to iDVD Lion that lets you author DVDs with beautiful menus and burn movies to DVD disc for playing on any home DVD player.

DVD Creator for Mac is a program with most likely features to iDVD, and even better than iDVD. Apart from burning video files to DVD, it also features slideshow making tools to transform your photos to slideshow with music, and then burn to DVD with your DVD burner on your Mac. Below I'll show you how to burn video and photo files to DVDs without Lion iDVD. If you're using Mountain Lion, see iDVD for Mountain Lion.

Step 1 Download and install this Mavericks iDVD. Click the above Free Download button, and the program file will be downloaded to your Mac automatically. After that, you can double click the program file to launch the installation wizard and follow up the easy steps to install the iDVD for OS X Mavericks. Cisdem DVD Burner. System Requirement: OS X 10.10 or later, including macOS 10.14 Catalina. Idvd Mac download on RapidTrend.com rapidshare search engine - iMovie HD 6 iDVD 6 For Mac OS X Visual QuickStart Guide 2006,. Free Search Engine for Rapidshare Files. Type what you are looking for in the box bellow, hit search and download it from RapidShare.com! Idvd mac rapidshare. 1 results found, page 1 from 1 for 'idvd mac'.

Why There is No iDVD for Lion?

Not found **iDVD on Lion**? iDVD disappeared after upgraded from Snow Leopard to Lion? Just take it easy. From Lion, iDVD no longer comes with every new Mac. It's ridiculous the latest Lion does not come with iDVD, but the Mac Book Pro, running Snow Leopard, has iDVD installed. The current Apple wants people to distribute home movies to friends and relatives via iCloud or the advanced Final Cut Pro X by Apple, rather than send them a DVD disc burned with iDVD for free.

Obviously, iCloud is not everyone's choice. DVD is still a convenient media to transfer movies, or to watch movies on TV. Here is the solution. If you think iDVD is a must-have, you can complaint on Apple's site (some people get free iDVD copy by this way), or if you have iLife '11 DVD, you can install iDVD from the DVD. The last way is to find an iDVD for Mac equivalent that works on Lion.

Download iDVD on Lion?

No, it's impossible. There's no iDVD download for Mac at all on the Internet and Apple stopped to deliver it. However, you can install it if you have the iLife'11 box, which includes iDVD. If you have no, but still want to use iDVD on Lion. Try to buy it on Amazon.com.

Have upgraded to Mac OS X Lion and found iDVD isn't there anymore? Still want to burn your downloaded videos, camera videos, etc. to DVD for playing on your home DVD player or TV, or send the discs to family and friends for convenient sharing and long-term storage? Well, take it easy since there are many DVD burning programs work well on Mac OS X Lion and Mountain Lion, for instance, Aimersoft DVD Creator for Mac. Here you will get a general idea of this app and learn how to create DVD with it on Mac OS X 10.7 Lion.

Aimersoft Mac DVD Creator is a professional yet easy-to-use Mac DVD burning tool that runs well on Mac OS X 10.7 Lion. It can burn DVD from various video formats like MP4, MOV, M4V, MKV, FLV, WMV, M2TS, 3GP, etc. and convert your iMovie project, Final Cut Pro edited videos, etc. to DVD in Lion with ease. In addition, the built-in free DVD menu templates and video editor let you take your DVD movies into the next level instantly. Apart from burning videos, it also enables you to create eye-catching photo DVD slideshows with background music. Now just download it and follow the steps below to burn your video and photos to DVD in Lion for view on any standard home DVD player or TV.

[Use iDVD Lion alternative to burn DVD in a few clicks](#)

[1Add video files](#)

After downloading and installation, open the Mac DVD Creator and add videos to it in either way: a> Click + to select and load media files from your hard drive. b> Directly drag the videos you want to burn to the program.

Tips: You can edit videos and photos by clicking the Edit button beside each clip. Video editing functions like crop, trim, rotate, add watermarks, etc. are provided while photo editing features like transition, text and music are offered.

2 Personalize DVD menu (Optional)

Various static and dynamic free DVD menu templates are provided for your choice. You can select one and then customize it with your favorite images, music, frames, button, etc. And if you don't want to apply a menu, simply choose 'No Menu' to skip the DVD menu.

3 Start to burn

OK, the last step is to insert a writable DVD disc (DVD-R, DVD+R, DVD-RW, DVD+RW, DVD+R DL, DVD-R DL, DVD-5 and DVD-9 are all well supported) into your Mac and click 'Burn' to start burning the added media files to DVD. You can also save files as DVD folder, .dvdmedia, or ISO file for burning later.

Impressed by this iDVD replacement for Lion? Just get it now and enjoy your videos on TV!
