

QuietTorque™ 60.0SD LC

Clean, Green, and Quiet!

Electric propulsion systems engineered and built by sailors for sailors since 2004!

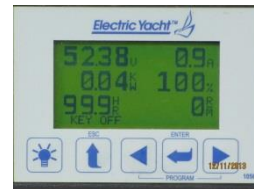

The **QuietTorque™ 60.0SD LC** is recommended for boats up to 60' (LOA) and 45,000lbs displacement. Liquid cooling provides for high sustained output, ideal for hybrid applications. Typically replacing diesel engines up to 60 hp. Typical battery size is 400Ah or more, at 48Vdc.

Specifications

Motor type	2 PMAC Brushless
Voltage	96 Vdc (Nom.)
Max Input Power	60.0 kW
Max Cont Bower	50.0 kW
Weight	240 lbs (109kg)

Standard Features

Motor Mounts	Fits 9" hole through hull, same as diesel saildrives
Throttle	Anodized Al waterproof throttle with key & neutral lock
System Monitor	High capacity programmable monitor <ul style="list-style-type: none"> • State of charge • Voltage, Current draw, RPM, battery type • Instant and accurate • Distance to discharge • Programmable regeneration • Program throttle forward/reverse and throw
Power Switch	Gigavac two position power on/off switch
Relay	500amp vacuum TE Connectivity relay
Fuse	Class-t fuse & holder

Why Electric Yacht

- UNPARALLED CUSTOMER SERVICE AND ENGINEERING
- Computer generated marine projections
- Three year warranty
- Designed for customer installation

The **QuietTorque™ 60.0SD LC** is very complete and includes everything you will need except batteries, battery cables and charger. Contact us directly or through one of our dealers and we will help you design a complete system to meet your particular needs.
