

BATTERIES AND CHARGERS

LITHIUM-ION BATTERIES AND CHARGERS

Lithium-Ion batteries are considered one of the greatest innovations in nearly 20 years!

Indeed, these batteries offer several benefits:

COMPATIBLE: With other battery tools such as the 600MH-Li cable laying machine, chainsaws, edgers, lawnmowers, leaf blowers, etc.

RECHARGEABLE: Can be charged to full capacity at any time during the discharge cycle without damaging the cells.

SIMPLE: Feature an energy gauge that displays the charge level in order to evaluate the remaining operating time before or during work.

PROFESSIONAL PERFORMANCE: Thanks to their extremely high efficiency, they provide enough power to operate powerful tools for a long period of time. In addition, they have a low self-discharge rate when not in use. Only 1.25% per month.

ZERO EMISSIONS: Electric motors do not produce exhaust gases or emissions. They can therefore be used both outdoors and indoors. In addition, the use of rechargeable batteries implies a sustainable use of resources.

Several brands and models of batteries and chargers are compatible with our cable laying machine 600MH-Li.

This is a non-exhaustive list. Other brands or models could be added. We invite you to contact your dealer to find out which ones are available in your area.

B A T T E R I E S	BRAND	MODEL	TENSION	RATED CAPACITY	RECHARGE TIME (100%)	WEIGHT (LB)
	BRIGGS & STRATTON / SNAPPER XD	BSB2AH82	82 V	2 Ah	30 min	3.3
