

# Having fun is not rocket science

**Flying Tiger Copenhagen is on for February family fun. Kicking off half term with a new range of toys that'll both spark kids' imagination and stimulate their zest for learning. Even answer some of their quadrillions of questions. Well kids, ask away and explore the fascinating mystery of chemistry and natural science.**

Eat your heart out, doctor. Kid scientists are taking over the operating room this week. And what a fascinating study awaits! Open a dolly's torso and explore the thrilling science of biology and learn about our awesome anatomy.

Or skip biology class and move on to zoology and the wonders of the closest living thing to dinosaurs – a crock that rocks! DIY, first by building its wooden skeleton and then adding layers of play clay.

All wooden toys are made from FSC-certified tree and all plastic is recycled.

**Available online and in stores from February, prices from €3.**
