Before using the Wi-Fi Camera please read the following:

1. **Important data:**
   Sensor Size: 1/2.8"
   Image Sensor: Sony CMOS IMX307LQR-C
   Pixel Size: 2.9μm x 2.9μm
   Frame Rate: 25fps @ 1920 x 1080
   Operating System: Win7/Win8/Win10/Win11/Mac OS 10.11 above
   Includes: Wi-Fi Camera, Antenna, Power Brick, Power Cable

2. **How to use:**
   a) Install AmViewer on your PC, Laptop, or MAC and start the application.
   b) Connect the camera to the power source using the included USB cable. The light on the camera should start blinking green.
   c) On your system under Wi-Fi settings, select and connect to MD200-WF-XXXX. Once connected, the light should become solid green.
   d) In the AmViewer application, under "Choose Input Device", select the camera.
   e) The camera feed should populate in the window and be operational.

3. **Precautions for safe usage:**
   a) For indoor use only.
   b) Store in a cool, dry location.
   c) Disassembling, modifying, or tampering of the camera will void the 1-year warranty.
