

E-RIDERS

NATIONWIDE DEALERS WANTED

THE BENEFITS

We are excited to share with you the incredible value of becoming a dealer for E-Riderrs Scooters. Selling E-Riderrs Scooters opens up a world of opportunities and advantages for your business. Here are the key values and benefits that come with partnering with us:

HIGH-QUALITY PRODUCTS

E-Riderrs Scooters are built with exceptional craftsmanship, ensuring durability and long-lasting performance. Our scooters are fun, sleek, and stylish, setting them apart from other electric mobility alternatives in the market. With their 9-inch wide tires, max speed of 28 mph, and range of up to 30 miles, they offer a thrilling and dependable riding experience.

GROWING MARKET DEMAND

Electric mobility is rapidly gaining popularity, and E-Riderrs Scooters are at the forefront of this trend. By offering our scooters, you tap into a growing market demand and position your business as a provider of innovative and eco-friendly transportation solutions.

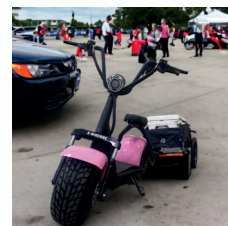

WHITE GLOVE TREATMENT

We believe in providing exceptional support to our dealers. When you partner with us, you can expect white glove treatment, including comprehensive product training for your staff. We ensure that your team is equipped with the knowledge and expertise to assist customers effectively, creating a positive and memorable buying experience.

MARKETING SUPPORT

Our dedicated marketing team will work closely with you to develop tailored marketing strategies. We run focused social media campaigns in your territory, driving customer traffic directly to your store. Additionally, we promote our dealers on our website, directing interested customers to your location.

DIVERSIFIED PRODUCT MIX

Adding E-Riderrs Scooters to your current product mix offers a unique opportunity to diversify and expand your offerings. By introducing these cutting-edge electric scooters, you attract a new type of customer and stand out from competitors. E-Riderrs bring innovation, style, and reliability to your showroom.

TWO BROTHERS BEHIND THE WHEEL

JUST LIKE MANY OF OUR CUSTOMERS, WE GREW UP LOVING TOYS.

As we got older, our toys got bigger. We drove minibikes, go-karts, four wheelers, motorcycles and just about anything that would go. Many of our early memories involved riding around with our dad on these toys. Eventually, we grew up and could set out on our own. We grew up in the city, but loved our time on our family farm hunting, fishing and spending as much time as we could outdoors. Often these vehicles were an intimate part of the excitement and the experience. Our kids today are very similar, but their toys are starting to evolve.

Today, we still have four wheelers, go-karts and other gas powered vehicles, but there is an emerging set of vehicles quickly coming to market. The world is moving away from gas powered transportation and is quickly adopting cleaner more accessible means of mobility. Many people today ride electric scooters, one wheelers and electric bikes, but most of these are aimed at kids and active young adults.

WE WOULD LOVE IF OUR CUSTOMERS VIEWED E-RIDERS AS ANOTHER OPTION.

Not to replace any of the previous toys, but to provide adults with an alternate way of getting outside and creating experiences, similar to the ones we had as kids. We believe that E-Riders are the next big thing. We believe that they are fun, safe, reliable and can help us all capture the feelings we had when we were younger; while creating new experiences, creating new memories and enjoying the outdoors more than we ever have.

The E-Riders family is excited to introduce what we believe is a game changing mode of transportation. Our single person electric vehicles is going to allow everyone a fun way to enjoy the great outdoors. E-Riders are easy to maintain and are 100% electric.

WE BELIEVE THIS IS THE FUTURE OF ELECTRIC RECREATIONAL MOBILITY.

Whether you are a family that desires to get out and spend time outdoors or someone looking for an inexpensive and reliable mode of transportation, we believe that we have an E-Rider for you.
