

YOUR NEW TURNER + THE TUMBLER GRIP INSTRUCTIONS

Using these grips are easy. **While holding the PVC Pipe**, turn the Wheel on the Grip and the arms will start to expand inside the Tumbler or Dog Bowl.

Do Not hold the Tumbler while tightening the wheel, **you will break the arms that way**. The Sporty Grip and Bullet Grips are different than the Normal Tumbler Grip and does not come with the rubber pads on the arms. This is by design so that it can fit through the smaller openings.

You may also notice that they slip a little inside the tumblers and that is okay, they **Do Not** have to be super tight. I would suggest watching the video in the links below to see how these are used. **Avoid Getting Spray Paint on the Grips**, this will eat away at the plastic. Apply some Vaseline on the PVC threads coming off the turner to prevent the PVC arm from sticking to the PVC fitting on the motor.

Our ***Roller Stands*** are height adjustable. Loosen the wing nut and slide the bearings up to the height of your PVC pipe to keep the turner arm parallel with the base of the turner. There are holes in the base of the Roller Stand. The 2 screws that are screwed into the base of the turner will go through these 2 holes and attached to the turner this way.

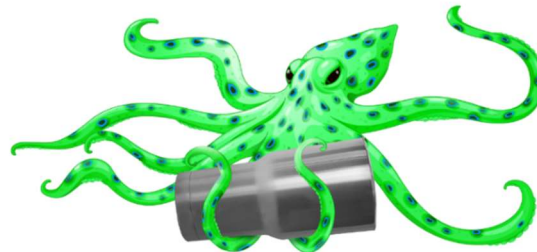

Our Line of Tumbler Grips are 3D Printed with high quality materials; however, it is still plastic and can be broken so do not over-tighten or be forceful with them.

NEW Christmas Ornament Grip – To remove ornament from grip pull straight out and DO NOT twist or bend. They POP on and POP off!

Do Not use these near a heater or in any heated / dryer environment. Anything above 100 degrees Fahrenheit will soften and bend the parts.

Do Not get epoxy on your Tumbler Grip as it will lock it up once it cures and most times you will not be able to use them.

DO contact us at any time if you have any questions. Our contact info is below. **DO** Enjoy your New Tumbler Grip!

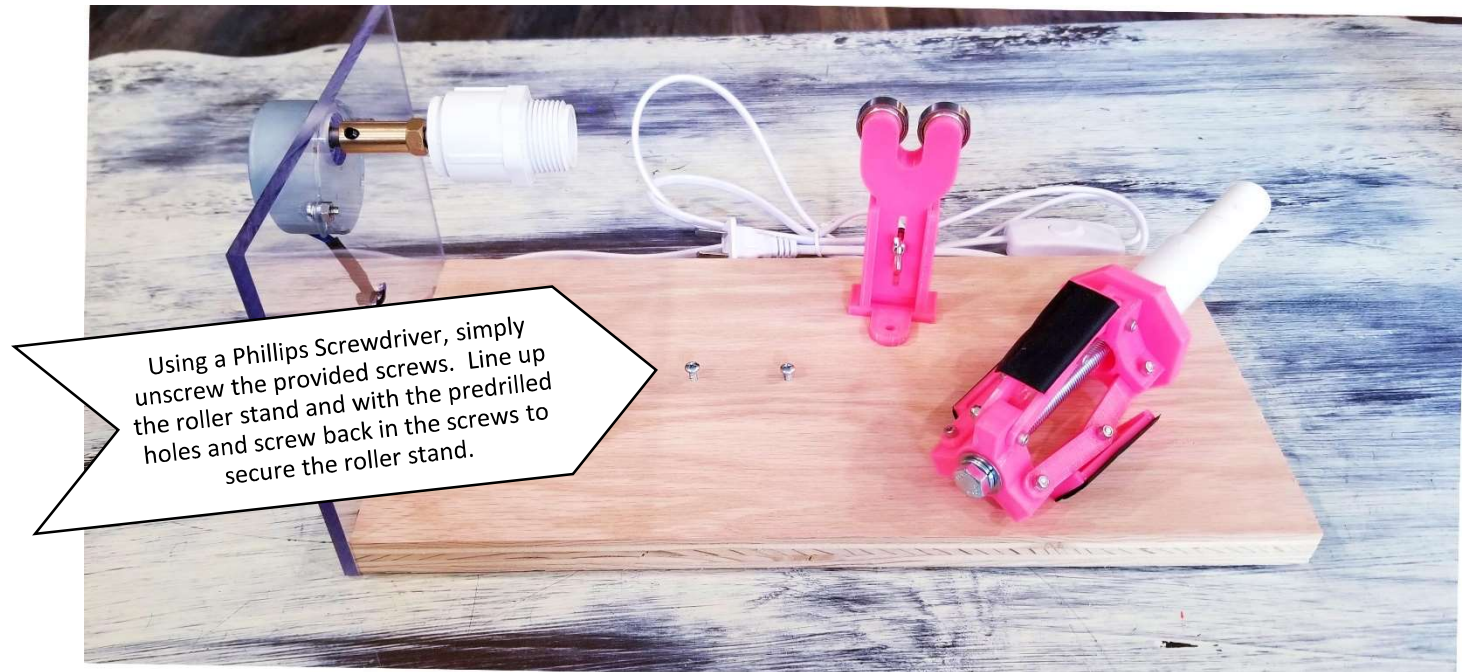

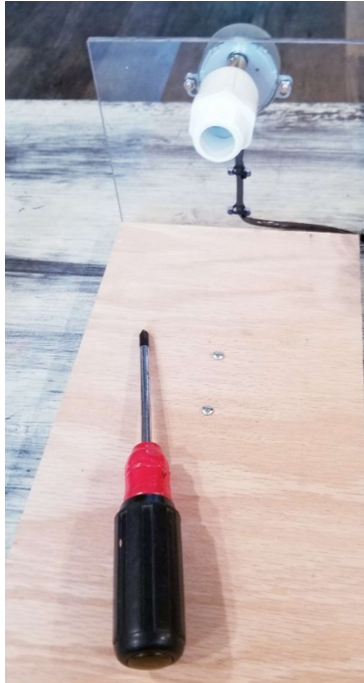

THE TUMBLER GRIP
DON'T LET IT SLIP! USE THE TUMBLER GRIP!
