

The Bomb Squad Assembly Guide

Take the red papers with dyanmite painted on from the bottom of the suitcase.

Turn around the red papers and place a long ABS tube on it. Remove both white paper and leave on the double sided tape and roll the tube on the red paper.

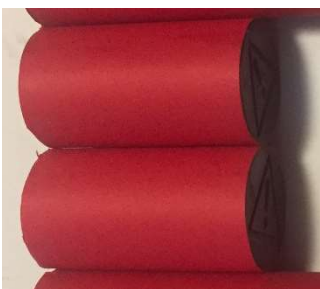

This is the final result.
Do it twice for each ABS
tube.

Take the small red papers and do the same as
the previous steps with the long tube.

Turn around the red papers and use the small ABS tube to
wrap around the red paper. Remove both white paper and
leave on the double sided tape and roll the tube on the red
paper.

This is the final result. Do it 4 times for each ABS tubes.

Place the dynamite sticks in this position.

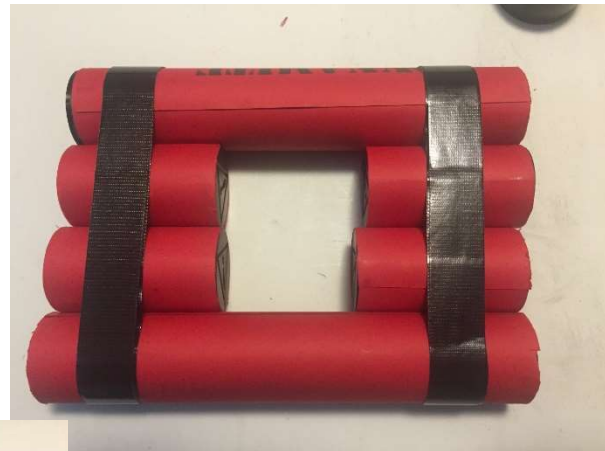

Place tape at around 1 inch from the end of the tube (does not have to be exact). Wrap generously so that it holds and that the tape is tight.

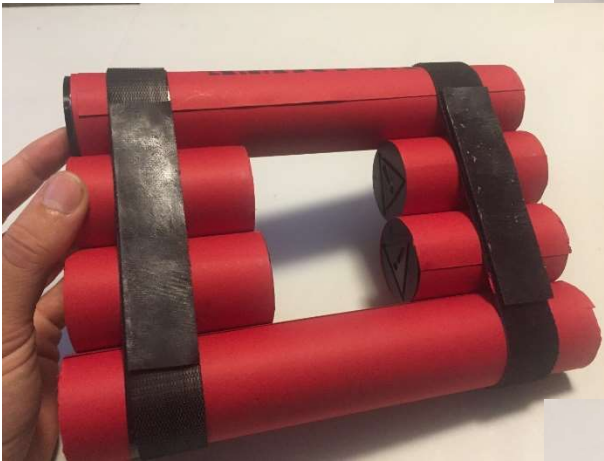

This is the final result.

Place the 2 small tubes in this position.

Place tape at around 1 inch from the end of the tube (does not have to be exact). Wrap generously so that it holds and that the tape is tight. This is the final result.

Place the two lines of double sided tape centered on the tape. Make sure to remove the protection on the double sided tape.

Remove the protective tape and place the front of The Bomb Squad on the tape. Press firmly so that it holds.

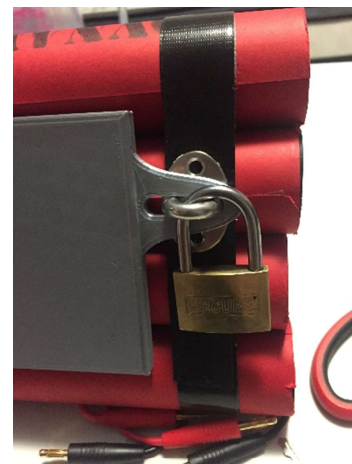

Take this piece out. It is 3d printed and comes with a small metal U Shape. The U Shaped metal will be used in a further step. It is normal that something is moving inside the door.

Remove the sticker on the mounting tape and place the back door on the black tape. Make sure it is centered and that the hole on the right side lines up with the tape. Press firmly for one minute.

Using the hole on the back door as a reference, stick the u-shaped metal on the black tape. Press firmly for a minute.

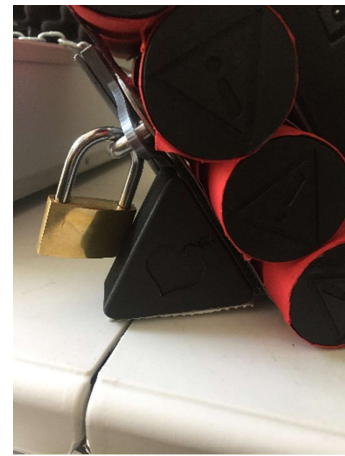

Close the door, place the lock in place and close it.

Take the triangle piece out. It is 3d printed and comes with a velcro tape. Remove the sticker on the velcro tape and place it just below the U shaped metal. Do not press firmly yet.

Make sure the holder works by placing it on a table. Move the velcro up or down to adjust. This part is only for showing the puzzle, you can remove it when playing it.

The Bomb Squad is now ready to be solved 😊
