

**It is not about filtering Virus.
It's is about neutralize on
contact.**

4 Ply Protective Mask

**Copper & activated carbon infused
nano film anti microbial layer.**

Anti Viral

Anti Bacterial

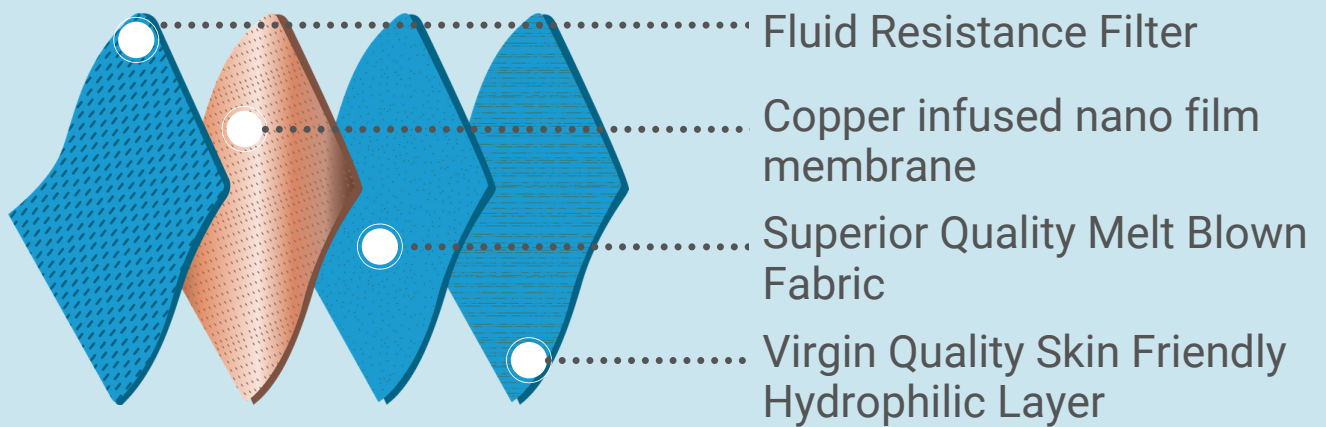

Dust Proof

Splash Proof

4 Layer Protection

Fluid Resistance Filter

Virgin hydrophobic Non-Woven layer with high water resistance which restricts airborne fluid particles that enters the mask from Outer Atmosphere.

Biodegradable Membrane

A natural polymer used in a wide range of medical applications, such as tablet coating. Coated with Activated Carbon & Copper Particles having proven antimicrobial properties.

Melt Blown Fabric

Superior Quality Melt-blown Fabric which can filter particles <98% with a size less than 0.3 micron

Hydrophilic Layer

Virgin Quality Skin Friendly Hydrophilic Layer which has Moisture absorbing capacity.

Features :

- Neutralize microbials on contact.
- Designed for high risk fluid environments.
- Provides excellent bacterial and particle filtration.
- Maintains breathability while providing the highest level of protection.

Specifications:

FUNCTION	PERFORMANCE
Fluid Resistance	160 mmHg
Bacterial Filtration	>98%
Particle Filtration	>98%
Breathability	<5
Flame Resistance	Class 1
