Install exhaust screen with diamond pattern
Minimum clearance from exterior wall to intake screen 1/2"

PN# CV-3 DVS

Diamonds are a home's best friend.

Keeping the outside where it belongs.

Birds, squirrels, chipmunks, bats and other animals often seek a warm nest in furnace and water heater exhaust vents, not only causing a mess, but a costly service call too.

Our patent-pending **Diamond Vent Screens** are specially designed to let these varmints know homeowners aren't interested in having them over for a visit. Designed with furnace and water heater exhaust pipes in mind, our screens keep birds and small animals where they belong – outside.

In addition, **Diamond Vent Screens** prevent children from placing landscaping rocks and small toys inside exhaust pipes while playing outside. The screens come in four sizes:

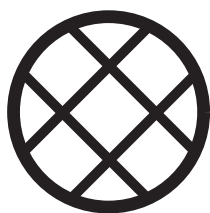

Screen size	Actual diameter	Part #
2"	2 3/8"	DVS-2
2.5"	2 7/8"	DVS-2.5
3"	3 1/2"	DVS-3
4"	4 1/2"	DVS-4

Trust **Diamond Vent Screen** to protect your home from unwelcome visitors.
