

MUD KITCHEN ASSEMBLY INSTRUCTIONS

Included in the box for assembly:

- 1 x backing board
 - 4 screws (medium mud kitchen)
- OR
- 6 x screws (large mud kitchen)

You will need:

- Drill (recommended)
 - OR a Phillips head screwdriver
- Tip: If using a drill ensure it's on the slow setting

The last step

For the mud kitchen please complete the 'sensory table' assembly instructions first, then come back to this sheet. Ta for now!

Alright so you've built the table, well done!

Now you just have to attach the backing board.

One side of the table has an extra piece of wood attached to the side. The backing board will attach to this side of the table.

Use the long screws taped to the inside of your tubs and screw them into the pre-drilled holes of the backing board through to the table.

And you're DONE! Congrats!

If you need any help just send us a message :)

Thank you so much for supporting our small family business!

♥ Emma & Myles
