

Instructions are universal for all table sizes

SENSORY TABLE ASSEMBLY INSTRUCTIONS

Included in the box for assembly:

- 1 x top tub holder piece
- 1 x bottom shelf piece
- 4 x legs
- 16 x screws already pre-drilled

You will need:

- Drill (recommended)
- OR a Phillips head screwdriver
- Tip: If using a drill ensure it's on the slow setting

It's as easy as 1, 2, 3, 4!

Alright. Breathe. You got this. You can do this. It's the easiest flat pack you'll ever do! Promise!

All the legs are numbered and will match up with the stickers on the top & bottom pieces.

Grab the 'bottom shelf piece' and lay it on the side.
Now grab the 'top tub holder piece' and lay it on the side.
Making sure the numbers correlate between the 2 pieces.
Good job! Easy so far, right?

Starting with one leg at a time.
(It doesn't matter which number you start with, just whichever is on the top once you've laid the pieces on the side)
Match the leg stickers up with the table stickers and screw in the 2 screws in the bottom and 2 in the top...slowly, we don't want to damage the wood.

Yay you've attached one leg!
Now do the exact same thing with the other 3 legs!
Just line up the numbers and finish screwing in the screws.
(Remove the numbered stickers so they don't leave a mark)

Pop in the tubs and HOORAY! You did it. I hope what I said was true for you and it was the easiest flat pack you've ever done. If you need any help just send us a message :)

Thank you so much for supporting our small family business!

♥ Emma & Myles

DON'T FORGET TO PROTECT

To help keep your table looking beautiful, coat your table with a clear oil, clear varnish or paint!
Follow the instructions of the oil/varnish as you will need to reapply these. We recommend painting if you are keeping it outdoors and not undercover.
