MUSLE ANATOMY

HOW IT WORKS?

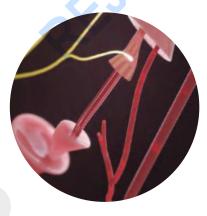

Myofibrillars loosen

As age grows, Myofbrillars are loose and fragile because of pregency, fat accumulation, lack of exercises and other factors. People become fatterand flabbier.

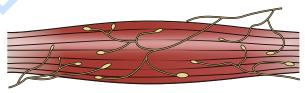

Myofibrillars break

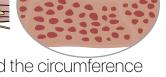

The equipment interact with muscle neurons to induce supra maximal muscle contractions. In the process of continuous muscle contactions, part of Myo-fibrillar are gradually broken to cause musceself-repair.

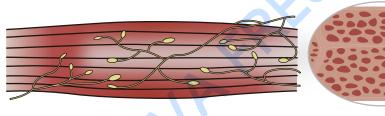

Myofibrillars repair

After treatment, Myoflbrillars tend to be strong and tight. Muscle becomes firm and elas-tic. It responds with a deep remodeling of inner structure that result in muscle building andgrowth and body shaping.

Before treatment: Muscle is thin and the circumference of muscle is short. Myofibrillar is loose with small density.

After treatment: Musice is strong and the circumference of muscle is long. Myofibrillar is strenthened and increased with large density.

HOW IT WORKS?

Fat accumulaton

When gain excess weight, more fat accumulates in the existing fat cells, causing them to swell and form cellulite. Fat accumulation can occur the abdomen, buttocks and thighs.

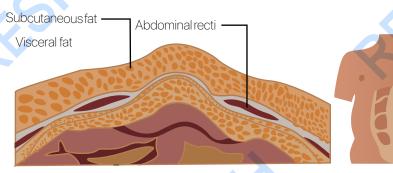

Fat disruption

Electro Magnetic Wave, inten sive supramaximal contractions enhance release of epienephrine which triggers a cascade effect leading to supramaximal lipolysis in fat cells.

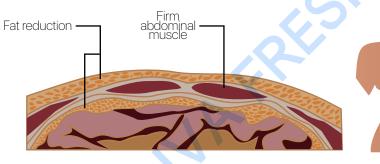

Fat loss

After UNT device treatment, targeted fat cels shrink in volume and are eliminated.

Before treatment: Subcutaneous fat and visceral fat are thickness. Muscle is thin with fatty and lossen body.

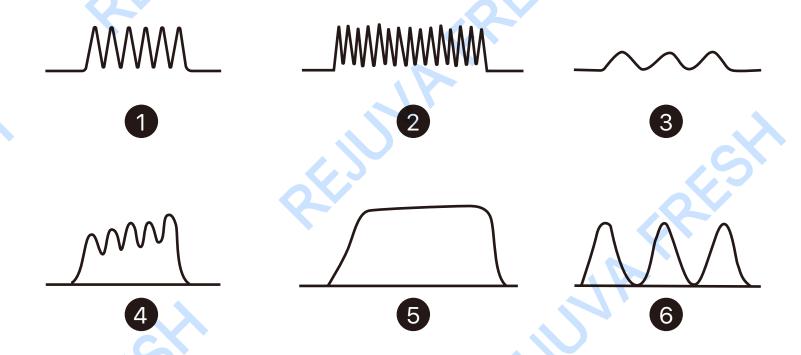

After treatment: Subcutaneous fat and visceral fat are reduced. Muscle is strenthened and increased with firm and strong body.

WORKING MODE

Exclusive Intelligent System

Auto mode and six treatment modes to meet the needs of different customers and different parts of the body. Meanwhile, for experienced operators, energy, frequency and time can be adjusted according to the type of customers to meet more requirements.

HANDLE DISPLAY

Body handle advantages

To avoid movement and falling off during treatment, there are 4 specially designed lengths' connection for the body handles, which can be selected according to the treatment sites and the treatment customers.

Limb Handle Advantages

The limb handle has dual output functions of RF and EMS. Either single EMS/RF or EMS+RF can be selected according to different treatment functions/areas/customers. One handle equals two, to save space and cost for customers.

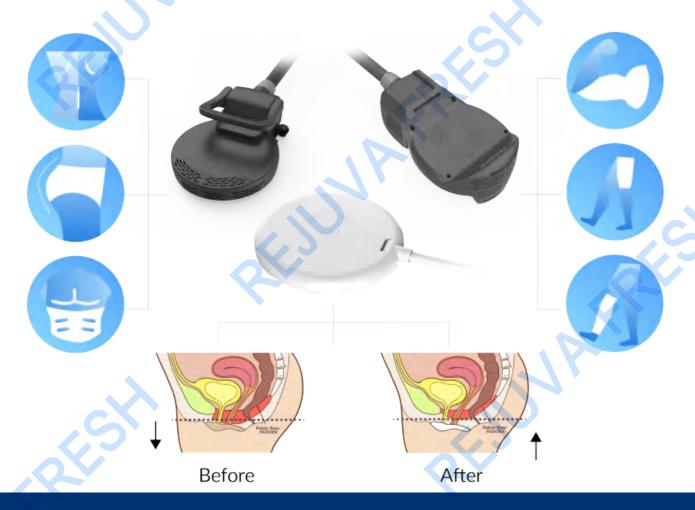

Handle Application

Muscle Building, Fat Burning, Body Slimming, Butt Lifting, The average muscle thickness increased by 16%, The average improvement of rectus abdominis was 11%.

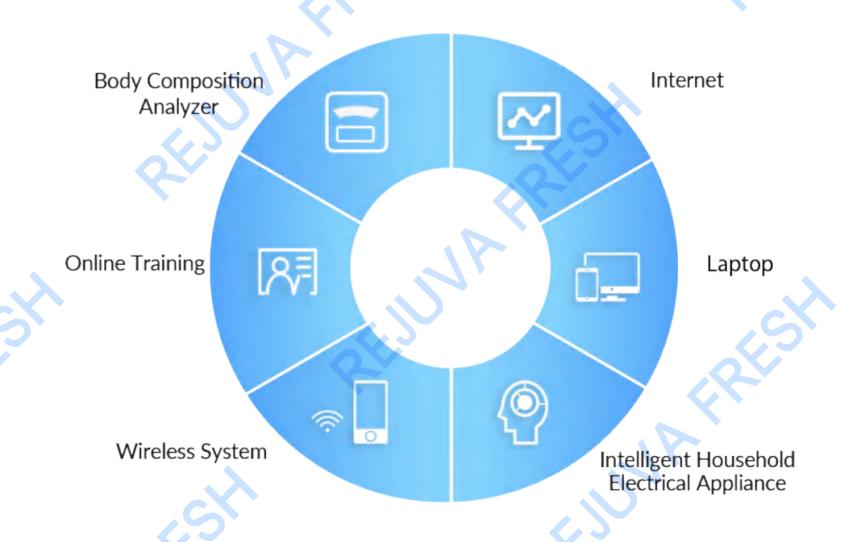

Prevention and treatment of stress urinary incontinence.

Promote postpartum recovery.

Increased vaginal wall thickness and lubrication after menopause.

ANDROID SYSTEM

Interface

- 1 Renting system, to be controlled by phone, very convenient;
- 2 Whether the host communicates with the screen;
- Both channels can work simultaneously;
- Treatment of parts: Arms / Abdomen / Hip/ Thigh/Calf;
- 5 Single EMS/RF or EMS+RF optional;
- Real-time display and monitoring of temperature of power supply, IGBT, RF Power Supply, Handles;
- 7 Energy/Frequency/Time can be adjusted accurately;

Interface

Smart Android System

EMShape Neo: HI-BODY MAX2+, which uses advanced Android system, is not just a machine that add muscle, but also supports Int -ernet access, storage and intelligent information processing. Now, in the information age, smart clinics need smarter machines. Smart Clinic is a multi-faceted solution that provides a complete picture of your business; whether it is a single clinic or a chain.

Smart clinic data center

13.3-inch Android system guides you through each treatment. Intelligent selection based on the body parts, intelligent generate accurate parameters and treatment time; Single EMS/RF or EMS+RF optional.

User manage

Customer management is smarter. Customer information storage and treatment records, making the treatment process more efficient.

Body Composition Analyzer

The Body Composition Analyzer connected with machine by bluetooth can record and analyze the varying data of before and after treatment, like weight, muscle, BMI index, obesity levels etc.

WEB Customers/Equipment Management

According to the annual equipment usage records, generate annual data statistics, which is convenient for customers to manage and analyze the use of annual reports;

According to the records, the annual statistical curve is generated, which can be used as a reference for whether to add new equipment or maintenance in the next year.

The quarterly and monthly usage duration and frequency of equipment are collected to analyze market cycles.

Internet

Clients can enjoy music, movies, games, and other entertainment activities during the treatment.

To get an attractive body you need to burn fat

Beautiful

Health

One course of treatment, Reduction of fat is

19%

Waist circumference loss

4cm

Fat metabolism increased to

5times

EFFECT

PARAMETER

Features	Parameters	
Voltage	220V/110V	
Eletrical Power	5000W	
RF Power	5M	
Output Frequency	10-90hz	, 0
Pulse Duration	250us	
Rated Power	2500W	
Cooling System	Air Cooling	
Operation System	13" Andriod Screen	
Net Weight	55kg	
Machine Size	44cm*50cm*115cm	
Packing Size	50cm*60cm*123cm	
Gross Weight	100 KG
