Please be aware that SketchUp must periodically 'check in' with the licensing and subscription servers. The timer is 28 days and is initialized when you sign into SketchUp, signing out and back will also reset the timer. If you're offline on the 28th day you'll need to connect to the Internet and launch SketchUp once so that it can be renewed.

SketchUp is a three-dimensional graphic design program that lets you easily and quickly build and model all kinds of 3D models. It comes with a complete tutorial which helps you learn how to use all of its tools in no time at all. The tool includes all kinds of modelling options, from creating basic geometric figures to manipulating vertices and planes, not to mention its texturing, lighting and rendering options.

Creating a geometric shape is very easy. All you have to do is draw a rectangle with the pencil tool and drag it with the mouse to add volume. After that, you can create windows, doors and all other shapes you can think of. It also lets you include colors and textures in your models. If you're not good at creating your own models, the program also includes a huge database with resources that have been created by other members of the community and which you can use for free, they include all kinds of things, from furniture, to human figures and any other kind of decorative element.

SketchUp lets you export your creations to different graphic formats, such as JPG, BMP, TIFF, PNG for 2D and 3D rendering, DEM, DDF, DWG, DXF, SKP for object and 3D scenes. It also lets you render moving video scenes in MOV and AVI.

Its a multi-purpose tool for both industrial design, architecture and decorating. Plus, the application has been designed so that you can upload your models onto Google Earth and thus share them with the rest of the program's users. If you can create a 3D image of a building or monument in your city then you're the type of person who should be using SketchUp.
